- ❖ Caulking in front of Berlin's and M.H. McCoy Fine Antiques is on-going.
- ❖ Demolition of sidewalks and curbs on the west side of King Street between Queen & Broad Streets is on-going. Once infrastructure work is completed, sidewalk replacement to the entrance of 145 King Street will occur in two stages for ease of access and egress. The Tellis Parking Lot entrance will be removed in about two weeks and parkers will need to use the 93 Queen Street Garage. Curb installation is scheduled for next week.
- ❖ SCE&G gas line work on Lower King is finished.
- ❖ Ductbank work began this week in the south side lane of Queen Street near the King/Queen intersection. One lane of traffic is open on the north side. **Next week, the County Garage entrance on Queen Street will close on Monday. Please use the Meeting Street entrance. Later next week, one exit will close, but the remaining exit will be available. Also late next week, the entrance behind the Mills House will close. When construction is not in progress, the work will be plated.**
- ❖ Trucks heading west on Queen Street must not turn left onto King Street but must go straight through the intersection to access Broad Street. Trucks on King Street must not turn right onto Queen Street but must continue straight to Broad Street. Vehicles exiting the 93 Queen Street Garage must turn left upon exiting the garage.
- ❖ Crosswalk installation on the southwest corner of the King/Queen Street intersection is on-going next week. Occasionally, Queen Street on this side of the intersection will close briefly for concrete to be poured. Please be patient, or another option is to proceed to Broad Street. Thank you in advance for understanding.
- ❖ **Carriages** are not permitted on Queen Street. Because Clifford Street will be closing next week, carriages are not permitted to go down Horlbeck Alley and turn left onto King Street. Please contact Tourism Manager, Danielle Dillahey at 834-0188 to inquire about alternate routes for the carriages. We sincerely apologize for the inconvenience to the carriage companies and their customers.
- ❖ Caulking in the half block between 169-B King & Queen Streets is on-going.
- ❖ In the half block between 171 King & Clifford Streets, electrical ductbank work is completed while water laterals and meter installations, curb and bluestone installations are on-going.
- ❖ Next week, Clifford Street will close for at least two weeks to tie-in an electrical ductbank to the vault. The ductbank work on the south sidewalk on Clifford Street was completed this week.
- ❖ Fulton Street re-opened to normal, two-way traffic this week with the crosswalk construction completed. All delivery trucks accessing Fulton Street from King Street must avoid running over the corner on the north side. Surveillance is underway.

Patience is a particular requirement. Without it, you can destroy in an hour what it might take you weeks to repair.

Charlie W. Shedd
